This 2-part certificate is for anyone wishing to serve at end of life, including people interested in exploring their own mortality and desiring to deepen their present moment awareness and a full experience of life.

Phase I is a life passage journey connecting us to our collective roots and the impermanence of life. This program grounds us in our own emotional healing and spiritual inquiry, helping us prepare to serve others.

Phase II consolidates our skills and intentions toward developing an End-of-Life Doula Practice. Some of the highlights:

- restorative & releasing "practices for death"
- vision mapping for end of life
- grief & forgiveness activities
- exploration of five domains of Life
- expert presenters in emotional, physical, and after-death rituals & care
